

**4-x-**

**Galileo Galilei Institute**  
**6-10 Nov 2023**

## **Quantum observables for colliders**

- \* Small and focused workshop (~50 participants)
- \* Theory and Experiment. Programme Monday to Friday
- \* Focus on the definition, measurement and interpretation of observables at collider
- \* Considerable time allowed for discussions
- \* Invited experts for special lectures in quantum technologies/information/computation
