

Workshop “Particle therapy - future for the Baltic States? State-of-play, synergies and challenges”

Contribution ID: 11

Type: **not specified**

Session V “Educational necessities and possible solution pathways for clinical and technical personnel training”

Thursday 25 May 2023 15:20 (1 hour)

Key topics: From previous discussions, a clear need to understand educational and training opportunities of personnel, both clinical and technical, was identified, as currently specialists in particle therapy related fields are lacking. Key necessity areas are to be defined and international educational opportunities and collaborations are to be discussed. Ways, how to implement the possible solutions of the educational aspects early-on within the project initiative, are to be discussed and identified.

Moderator: Andrejs Ērglis (University of Latvia)

Presenters: Dr KOROBEINIKOVA, Erika (Lithuanian Society for Radiation Therapy / Lithuanian University of Health Sciences); PALSKIS, Kristaps (Riga Technical University (LV)); DOSANJH, Manjit (University of Oxford / CERN)
