

Offline procedures

- **For first pp and Pb-Pb data the requirement was to publish first results as quick as possible**
 - ⇒ **To that the offline procedures were adapted**
- **Now we have to change the attitude: the main requirement is the quality of the results**
 - ⇒ **And we have to adapt the offline procedures to this**
 - ⇒ **We did not succeeded to do this with last year pp (second physics) data – we create a time hole!**
- **We have a complicated inter-dependences in calibration**
 - ⇒ **We have to streamline the procedures**
 - ✚ **where and when the calibration of different detectors can be done**
 - ✚ **on what it depends ?**
 - ✚ **where a human intervention is needed ?**
 - ✚ **which statistics is needed ?**
 - ✚ **how to “synchronize” different detectors ?**
