

“Alternative concepts” section in Sec.4 (Asuka Ito) (miscellaneous)

Currently

- Heterodyne enhancement of magnetic conversion → Aldo Ejlli
- Superconducting rings
- Graviton-magnon resonance

New proposals

- GW detection with atomic clocks (<https://arxiv.org/pdf/2304.10579.pdf>) → Elina Fuchs
- GW detection with one-electron quantum cyclotrons (<https://arxiv.org/pdf/2309.02992.pdf>)
- GW detection with Rydberg atoms (<https://arxiv.org/pdf/2311.03890.pdf>)
