

Implications of LHCb measurements and future prospects

Thursday, 26 October 2023

QCD spectroscopy and exotic hadrons - 500/1-001 - Main Auditorium (14:30 - 17:30)

-Conveners: Elisabetta Spadaro Norella; Roberto Bruschini; Zehua Xu; Miguel Albaladejo

time	[id] title	presenter
14:30	[61] Search for pentaquarks decaying to open charm	ROBERTSON, Gary
14:55	[66] Molecular hadrons (particularly pentaquarks) from the EFT perspective	PAVON VALDERRAMA, Manuel
15:20	[63] Conventional spectroscopy	WANG, Ziyi
15:45	Coffee break	
16:15	[62] Born Oppenheimer effective theory for hybrids and doubly heavy tetraquarks	MOHAPATRA, Abhishek
16:40	[65] Multiple quarkonia production at LHCb	ZHOVKOVSKA, Valeriia
17:05	[64] Structure of all-charm tetraquarks and LHC states	Dr ANWAR, Muhammad Naeem
