

Dear Colleagues,

It is with great pleasure that we are welcoming all of you to the

39th ICRC, the astroparticle physics conference in Geneva (Switzerland), July 15-24, 2025

The ICRC conferences are held biennially since 1947 under the auspices of Commission C4 of the International Union of Pure and Applied Physics. Researchers from around the world gather to present and discuss the results of their research and outreach activities in cosmic ray physics, high-energy and gamma-ray astrophysics, neutrino astrophysics, dark matter studies, solar and heliospheric physics, as well as multi-messenger and gravitational wave astronomy.

The University of Geneva and CERN, together with the Local Organizing Committee, the International Scientific Program Committee and the International Advisory Committee are proud to organize ICRC 2025. They look forward to welcoming you to a productive and inspiring conference.

Dates: July 15-24, 2025

Venue: International Conference Centre Geneva (Switzerland)

Web: <https://indico.cern.ch/e/icrc2025>

The registration and abstract submission are scheduled to open on December 16, 2024.
