# Results of the follow-up of external triggers with KM3NeT

KM3NeT is a European research infrastructure developing second-generation multi-km³ neutrino telescopes on the Mediterranean Sea floor. It consists of two main sites targeting complementary neutrino energy regimes: KM3NeT/ARCA for TeV-PeV neutrinos and KM3NeT/ORCA for GeV- few TeV neutrinos.

Within the KM3NeT collaboration, an automated system continuously monitors and analyzes real-time external alerts originating from various cosmic messengers, including neutrinos, gravitational waves, and electromagnetic signals across the whole spectrum. This contribution provides a review of the analysis methodologies exploited for the follow-up and a summary of the analysis results obtained with the KM3NeT detector data during their operation.

## Collaboration(s)

KM3NeT

**Authors:** VEUTRO, Alessandro (Sapienza Università di Roma); ZEGARELLI, Angela (Ruhr Universität Bochum (RUB)); DORNIC, Damien (CPPM); GIORGIO, Emidio (Istituto Nazionale Fisica Nucleare (IT)); LE GUIRRIEC, Emmanuel; FILIPPINI, Francesco (Dipartimento di Fisica e Astronomia - Università di Bologna, INFN-Bologna, Italy); ILLUMINATI, Giulia (INFN-Bologna); VANNOYE, Godefroy; DE FAVEREAU DE JENERET, Jerome Paul E (Universite Catholique de Louvain (UCL) (BE)); PALACIOSGONZALEZ, Juan (IFIC (CSIC-UV)); MASTRODICASA, Massimo (Università degli Studi di Roma "La Sapienza" and INFN-Roma1); LAMOUREUX, Mathieu (UCLouvain); LE STUM, Sebastien (Aix Marseille Université, CPPM, France); Dr CELLI, Silvia (La Sapienza Università di Roma and INFN); CECCHINI, Vincent (IFIC Valencia - CSIC)

**Presenter:** FILIPPINI, Francesco (Dipartimento di Fisica e Astronomia - Università di Bologna, INFN-Bologna, Italy)

**Session Classification:** PO-2

**Track Classification:** Neutrino Astronomy & Physics
