APEL HEPscore Current status

- Initial changes to APEL server software made (loading, excluding aggregation)

- Messaging infrastructure has been set up for testing
  - See: https://twiki.cern.ch/twiki/bin/view/LCG/ChangesForHEPscore#Testing

- Staff absences have meant a delay to getting changes to APEL client ready
  - New staff member joining this month, which should help with team resilience

APEL HEPscore Next steps

- Normalised Summary record examples will be available by the end of this week

- Where sites can produce new format records themselves (i.e. not APEL client), these can be sent to the test infrastructure for checking
