

UPC 2023: International workshop on the physics of Ultra Peripheral Collisions

Thursday 14 December 2023

Photoproduction in peripheral collisions (17:00 - 19:40)

-Conveners: Charlotte Van Hulse; Wolfgang Schaefer

time	[id] title	presenter
17:00	[55] Single and double ratio of elastic vector meson production to inclusive hadron production cross section as a possible signal of saturation in UPCs	SUN, Huachen
17:30	[57] Photoproduction of J/ψ and dileptons in events with nuclear overlap with ALICE	BIZÉ, Nicolas
18:00	[27] Dimuon production at low transverse momentum in peripheral Au+Au collisions at $\sqrt{s_{\text{NN}}} = 200$ GeV at STAR	LI, Ziyang
18:30	[23] Measurements of the properties of photonuclear events in UPC with the ATLAS detector	DAS, Sruthy Jyothi
