Don't miss the magnificent floor panels of the Duomo

and the Piccolomini Library

An interesting innovative project in A.D. 1300 (floor panels of the Duomo ...)

SATOR  
AREPO  
TENET  
OPERA  
ROTAS

This is a square 2D palindrome, which is when a square text admits four symmetries: identity, two diagonal reflections, and 180 degree rotation.

Literal translation from Latin is not particularly illuminating. Your guess?
