

Comments on ISC Statutes

- 1) International Unions and National Academies are two ways to represent the world scientific activity. They should have an equal weight in ISC decision taking.
- 2) Please do not encourage fragmentation by admitting as members, sub Unions or sub Academies, at a time when we need to encourage integration of of all sciences for inter/trans disciplinary research.
- 3) stimulate collaborative projects, sustainability oriented, between unions and academies (as it was the case at the time of ICSU) especially now that a decade of sciences for sustainable development 2024 - 2023 has been proclaimed by the UN General Assembly.
