

**[H2020-ARIEL] "TRIGA
MAINZ Lab Course on Reactor
Operation and Nuclear
Chemistry"**

Sunday 19 November 2023 - Friday 24 November 2023

Mainz, Germany

Book of Abstracts

Contents

Get-together reception	1
Welcome adress	1
Instructions on safety and radiation protection	1
Lecture: Basic reactor physics (C. Geppert)	1
Test	1
Lecture: The OKLO Phenomenon: The Natural Nuclear Fission Reactor in Gabon, Africa	1
Lecture: The research reactor TRIGA Mainz (K. Eberhardt)	1
Lecture: TRIGA reactor control panel (C. Geppert)	1
Group 1: 1.1 - Reactor start-up procedure 1.2 - Lecture: Production of ultra-cold neutrons at the TRIGA Mainz	2
Group 2: 2.1 - Lecture: Production of ultra-cold neutrons at the TRIGA Mainz 2.2 - Reactor start-up procedure	2
Lecture: The Discovery of nuclear fission (T. Reich) / Introduction to the experiments (C. Geppert, K. Eberhardt)	2
Introduction to the experiments (C. Geppert, K. Eberhardt)	2
Group 1 - Steady state reactor operation @ 10 W / Reactivity experiment with Cd samples	2
Group 2 - Reactivity experiment with Cd samples / Steady state reactor operation @ 10 W	2
Group 1 - Pulse mode operation (up to 200 MW peak power) / Reactor pulse time structure Visual inspection reactor pool	2
Group 2 - Reactor pulse time structure Visual inspection reactor pool / Pulse mode opera- tion (up to 200 MW peak power)	3
Discussion of the experimental results	3
Lecture: Activation experiments for nuclear astrophysics studies (T. Heftrich)	3
Lecture: Application of research reactors (N. Passeo Barradas)	3
Introduction to the experiments	3
Group 1 - Decay scheme of Os-190m / Measurement of β -delayed neutrons	3

Group 2 - Measurement of β -delayed neutrons / Decay scheme of Os-190m	3
Discussion of the experimental results	4
Radiation protection measures: Practical exercises	4
Introduction to the experiments	4
Experiments on the discovery of nuclear fission	4
Discussion of the experimental results	4
Lecture: Neutron Activation Analysis (C. Stieghorst)	4
Final discussion	4

46

Get-together reception

53

Welcome adress

54

Instructions on safety and radiation protection

55

Lecture: Basic reactor physics (C. Geppert)

56

Test

57

Lecture: The OKLO Phenomenon: The Natural Nuclear Fission Reactor in Gabon, Africa

58

Lecture: The research reactor TRIGA Mainz (K. Eberhardt)

59

Lecture: TRIGA reactor control panel (C. Geppert)

60

Group 1: 1.1 - Reactor start-up procedure 1.2 - Lecture: Production of ultra-cold neutrons at the TRIGA Mainz

61

Group 2: 2.1 - Lecture: Production of ultra-cold neutrons at the TRIGA Mainz 2.2 - Reactor start-up procedure

62

Lecture: The Discovery of nuclear fission (T. Reich) / Introduction to the experiments (C. Geppert, K. Eberhardt)

63

Introduction to the experiments (C. Geppert, K. Eberhardt)

64

Group 1 - Steady state reactor operation @ 10 W / Reactivity experiment with Cd samples

65

Group 2 - Reactivity experiment with Cd samples / Steady state reactor operation @ 10 W

66

**Group 1 - Pulse mode operation (up to 200 MW peak power) /
Reactor pulse time structure Visual inspection reactor pool**

67

**Group 2 - Reactor pulse time structure Visual inspection reactor
pool / Pulse mode operation (up to 200 MW peak power)**

68

Discussion of the experimental results

69

**Lecture: Activation experiments for nuclear astrophysics studies
(T. Heftrich)**

70

Lecture: Application of research reactors (N. Passeo Barradas)

71

Introduction to the experiments

72

**Group 1 - Decay scheme of Os-190m / Measurement of β -delayed
neutrons**

73

Group 2 - Measurement of β -delayed neutrons / Decay scheme of Os-190m

74

Discussion of the experimental results

75

Radiation protection measures: Practical exercises

76

Introduction to the experiments

77

Experiments on the discovery of nuclear fission

78

Discussion of the experimental results

79

Lecture: Neutron Activation Analysis (C. Stieghorst)

80

Final discussion
