

# Thoughts on EDIA in dHTC Cyber-Infrastructure

*Thursday 21 September 2023 15:00 (10 minutes)*

Making space for new groups within our existing dHTC infrastructure community is essential for “democratizing computation.” This talk calls on participants to reflect on why so many research computing conferences have such homogeneous attendees. Some are long-term structural issues beyond our scope, but this should not absolve us from taking proactive measures to rectify this problem where possible.

## Desired slot length

5

## Speaker release

Yes

**Primary author:** WEST, Matthew

**Presenter:** WEST, Matthew
