## Plenary talks

We need

- talks on theoretical breakthroughs and connection between neutrino paradigm and everything else.
- talks on ongoing experimental situation
- talks on superbeam projects
- talks on beta beam projects (ion production, radiation issues)
- talks on neutrino factory and muon collider (target area, cooling, acceleration)
- talks on detector progress and how they impact the accelerators
- talks on precision of flux determination in SB, BB NF

and more -- your suggestions.

## Evening lecture

seek French speaking enlightened professor to inspire the crowds

suggestions:

- André Rubbia
- John Ellis
- others?

## **Round table discussion**

**While at CERN suggest round table discussion on  
Future neutrino facilities and the decision making process in the 2012 horizon**

**Would be interested:**

**Pier Odone, John Womersley etc.**

**... but date is of course an issue seems like 1 August  
is better date than 5 August.**

## **Seminar at CERN**

it is proposed to hold a seminar at CERN on e.g. monday afternoon

## **Can LHC discovery shed light on the neutrino paradigm**

possible speakers (From Mangano)

**Goran Senjanovic**

**Paco del Aguila**

**Alessandro Strumia**

**Gian Giudice**

**Antonio Masiero**
