

Session Program

4-6 Jun 2007

10th RD50 Workshop
Full Detector Systems

Vilnius, Lithuania

Tuesday 5 June

11:10

Full Detector Systems

Session | Location: Vilnius, Lithuania

11:10-11:30 **Radiation damage on MOS-structure**

Speaker
Qingyu wei

11:30-11:50 **Thin planar pixel detectros for highest radiation levels**

Speaker
Rainer Richter

11:50-12:10

Construction of rebondable module and first measurements with RD50 micron sensors and 3D-stc sensors

Speaker
Susanne Kühn

12:10-13:50 **lunch break**

13:50-14:10

ALIBAVA : A PORTABLE READOUT SYSTEM FOR SILICON MICROSTRIP SENSORS

Speaker
Ricardo Marco

14:10-14:30 **Neutron irradiation results of Si miniature detectors**

Speaker
Gianluigi Casse

14:30-14:50

Annealing and charge collection measurements of p-type strip detectors irradiated with neutrons

Speaker
Giulio Pellegrini

14:50-15:10 **Absolute charge measurements using laser setup - progress**

Speaker
Peter Kodys

15:10-15:30 **Silicon Beam Telescope for Super-LHC Detector Studies**

Speaker
Eija Tuominen

15:30-16:00 **coffee break**

16:00-16:20 **Results from the Common RD50 Run at Micron**

Speaker
Hartmut Sadrozinski

17:00

16:20-17:00

Discussion Session on Full Detector Systems
