Ethics, bias, and politics

Monday 11 September 2023 13:30 (1h 30m)

In this session, we will address a series of non-technical questions related with AI and with its impact on our societies. We will consider both the potentials and the side effects of these technologies in terms of their consequences on politics, ethics, gender and other societal balances. We will also discuss how these technologies should be regulated and governed to promote social fairness and the public good.

Presenters: TREGUER, Felix (CNRS); COLLET, Isabelle (University of Geneva); DUBERRY, Jérôme (Graduate Institute); CAREL, Léna (Expedia & Women in Data Science)

Session Classification: Session
