Copyright Statements for Conferences on the JACoW Website

- Mostly no statement at all,
- at best misleading or
- outright wrong.

Thanks to

Annette Holtkamp, Travis Brooks, and Jens Vigen for providing information which led to an unanimous decision of the Steering Committee at the last meeting to publish under Creative Common License.

To Do

- Change entry page of conferences
- Copyright statement in PDF (in Metadata or Imprint)?
- what else?

Status – Data Exchange

Data Exchange with INSPIRE

To support the aim of ORCID the decision was taken to supply the 'JACoW unique Author/Person id' and e-mail address in exported data sets for INSPIRE.

Status

Since June 2011 the XML export from JACoW databases contain the unique Author/Person id. End of Aug 2011 26 conference from 2007–2010 were converted so that in total we (I) now can update >10 200 conference papers with more than 21 000 authors (out of >120 000 papers with >38 000 authors on JACoW).

In addition

there is a XML query interface to JACoW's central repository to inquire data for an author (exact match, fuzzy).
