The DESY User Registry

Tuesday 17 October 2023 14:25 (25 minutes)

DESY's service for the management of central systems with regard to accounts, groups and mailboxes – the DESY Registry – is currently in version R2. It has been fully operational for about one year.

We will touch upon useful take-aways from the migration process, look at current development (APIs, MFA integration) and other feature requests that we are evaluating for the next development cycles.
