

MEDAMI 2024 - Inflammation and Infection Imaging

Saturday 25 May 2024

Contributed talks (12:30 - 13:20)

-Conveners: Elena Lazzeri

time	[id] title	presenter
12:30	[49] Inflammation Imaging with High Sensitivity Panel TOF PET Detectors	RAZDEVSEK, Gasper
12:35	[12] [18F]FDG-PET/CT and 99mTc-HMPAO-labeled leukocytes SPECT/CT imaging in a case series patients with possible infective endocarditis: which and when to use them	Dr AMBROGIO, Alice Dr SCARPUZZA, Marina
12:40	[3] The XEMIS2 camera installation progress at the Nantes University Hospital	BEAUPERE, Nicolas
12:45	[7] Opening New Possibilities for Inflammation and Infection Research using Dual-Tracer PET Imaging	LI, Zekai
12:50	[11] Comparison between three-phase bone scan and 99mTc-HMPAO-labelled white blood cell scintigraphy in patients with suspicious of hip or knee prosthetic infected loosening	Dr AMBROGIO, Alice Dr MARCIANO, Andrea Dr SCARPUZZA, Marina
12:55	[8] Comparison between [18F]FDG-PET/CT and 99mTc-HMPAO-labeled leukocyte SPECT/CT imaging in a case series patients with suspicious of vascular prosthesis infection: to trust is good but to check it out is better	Ms AMBROGIO, Alice Mr LEO, Andrea Ms SCARPUZZA, Marina
