22nd Conference on Flavor Physics and CP Violation (FPCP 2024)

Contribution ID: 71

Type: Parallel session

## Heavy-flavour production measurements in ATLAS

Tuesday 28 May 2024 14:00 (15 minutes)

Recent results on open heavy flavour and charmonium production from ATLAS experiment with Run-2 data are presented. This covers the double differential measurements of J/ $\psi$  and  $\psi$ (2S) production, D mesons and B+ production at  $\sqrt{s}$ =13 TeV

**Presenter:** HU, Qipeng (University of Science and Technology of China (CN)) Session Classification: Parallel - 6

Track Classification: Heavy quark decays and CKM
