

The Czech Particle Physics Project

Friday 19 July 2024 17:16 (13 minutes)

The Czech Particle Physics Project (CPPP) is introduced. It consists of two types of modules, learning modules for masterclasses aimed at high-school students (aged 15 to 18), and modules for educational aid and sources for expert information as web portals dedicated to Higgs boson research and searches for Supersymmetry. The modules are accessible at <http://cern.ch/cppp>. The modular structure of the CPPP allows to add new modules for educational aspects.

Alternate track

I read the instructions above

Yes

Authors: SOPCZAK, Andre (Czech Technical University in Prague (CZ)); ZACIK, Peter (Czech Technical University in Prague (CZ))

Presenter: SOPCZAK, Andre (Czech Technical University in Prague (CZ))

Session Classification: Education and Outreach

Track Classification: 15. Education and Outreach
