

Report from the first year of Young Researchers Council

Ruben Guevara and Tarje Hillersøy on behalf of YRC

September 27, 2023

NORCC Workshop Bergen

Outline

- What is YRC?
- What can YRC do for you?
- What has YRC been up to the last year?
- Questions and inputs
- Electing new members

What is YRC

- YRC is a network of young researchers connected to CERN
- Founded last year at NORCC 2022
- Consists of "non-permanent" staff
 - Master students
 - PhD students
 - Postdocs
 - Eirik and James
- Current leaders are:
 - Ida Storehaug - Leader (UiO)
 - Tarje Hillersøy - Leader (UiB/HVL)
 - Oda Langrekken - Vara (UiO)
 - Ruben Guevara - Faithful Master student representative (UiO)
- YRC is intended for students to form connections and learn from each other

What can YRC do for you (a non-permanent staff)

- Help you get in touch with other students across Norway working in the field
- Organize interesting meetings and workshops
- Help you get a feel for options within CERN-related research in Norway
- Provide tips and tricks that might be relevant to your own research
- Voice your opinions to the centre

What has YRC been up to the last year

- NorCC Workshop September in Oslo 2022: Inception
- Nordic conference of particle physics, Spaatind 2023: Informal meeting, getting to know each other, 10 participants
- NorCC steering committee meetings and presentations by Ida Storehaug
- Spring meeting 2023: Digital meeting with former students from HEP as speakers. Social activities with food and drinks, 23 participants
- NORCC Workshop September in Bergen 2023: ROOT tutorial, 16 participants.

Questions and inputs

- YRC is YOUR way of getting your opinions into NORCC!
- If there is something YOU would like to get from NORCC - speak now
- If you have an idea for a useful workshop or similar
- If you don't believe that the FCC is useful and Norway should focus elsewhere we won't tell your supervisor
- Does anyone in the audience know of/plan to partake in "the biannual NFS subatomic student event" - that might clash with Summer@CERN 2024
- Your opinions can be voiced to NORCC as early as tomorrow

Electing new members

- Members are chosen in principle for a period of 1 year
- This is not very time demanding!
- The work consists of organizing meetings and workshops a few times a year - but can be more (or less) depending on your creativity
- This is a very nice thing to put on your CV! It also lets you get to know the Norwegian CERN community better (hint: Including professors who may employ you in the future)
- We have two spots to fill, including the master student representative, so please if you would like to join, now is the time!
