

Ugis Sarkans has been coordinating software development in the Functional Genomics Group at the European Bioinformatics Institute since August 2000. He has been involved in development and running of ArrayExpress, a public repository for array based gene expression data, in microarray data standardization efforts, and in medical informatics projects. Before joining EBI he worked as a post-doctoral research associate in bioinformatics at the University of Wales. U. Sarkans received his PhD in Computer Science from the University of Latvia in 1998. His scientific interests include knowledge management, ontologies and modelling.
