

Transversity 2011

Trieste

Lošinj

welcome !

Transversity 2011

Third International Workshop on

Transverse Polarisation Phenomena

in Hard Processes

August 28 – September 3, 2011

Transversity 2011

Third International Workshop on

Transverse Polarisation Phenomena

in Hard Processes

August 28 – September 3, 2011

organized in the frame of

PRIN2008

ECSAC, the European Center for Science, Art and Culture
Trieste (Italy) and Losinj (Croatia)

→ brief comments

following PRIN2002 and PRIN2005

PRIN2008 is a Ministry-funded inter-university Italian Research Project of National Interest (PRIN) dedicated to the **role of transverse spin, transverse momentum and orbital momentum in nucleons**

PRIN 2008

- theory
 - experiments
- COMPASS
HERMES
JLab

Transversity Workshops

- PRIN2002
- PRIN2005
- PRIN2008

all “units” involved in the Local OC and in the International OC

Transversity Workshops

- PRIN2002
- PRIN2005
- PRIN2008

“units” involved in the Local OC and in the International OC

TRANSVERSITY 2011

Third International Workshop on
**TRANSVERSE
POLARIZATION
PHENOMENA IN
HARD SCATTERING**

29 August - 2 September 2011
Veli Lošinj, Croatia

spin
10th international spin physics symposium

TRANSVERSITY 2011

Third International Workshop on
**TRANSVERSE
POLARIZATION
PHENOMENA IN
HARD SCATTERING**

29 August - 2 September 2011
Veli Lošinj, Croatia

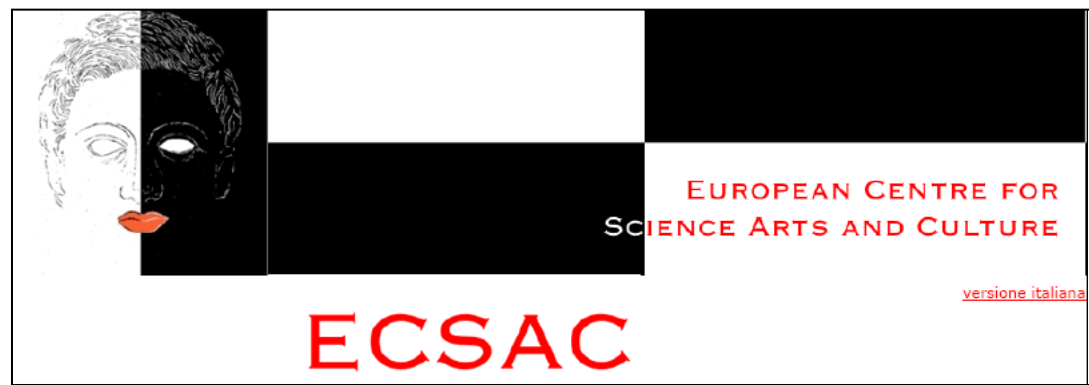

in the
framework of

EUROPEAN CENTRE FOR
SCIENCE ARTS AND CULTURE

versione italiana

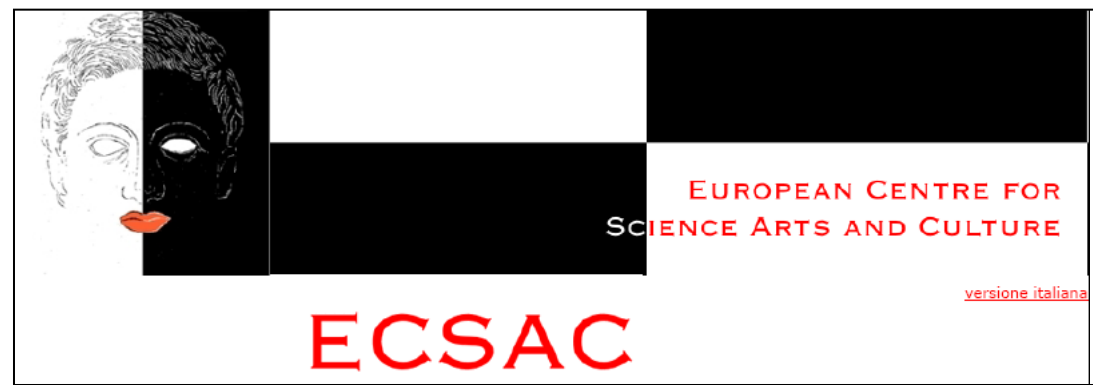

ECSAC activities

- **The ECSAC is a multidisciplinary institution created to foster a new concept devised at embracing science as a part of our culture and to stimulate culture and reciprocal knowledge and friendship amongst different peoples.**
- **It promotes cultural events and offers hospitality to scientists in the island of Lošinj, in Croatia**
- **The ECSAC's headquarters is in Lošinj, Croatia, while the Managing Committee and its secretariat are based in Italy, in Trieste, hosted by the Consortium for Physics at ICTP.**

<http://users.ictp.it/~ecsac/index.php>

WHY Trieste? Why Losinj?

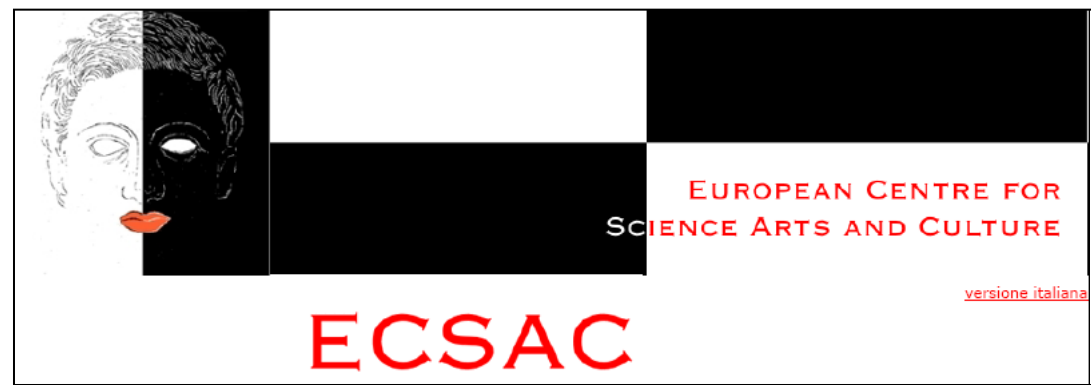

An initiative of the Physics Consortium in **Trieste**
to honour **Paolo Budinich** (born in **Losinj** 95 years ago),
father of the “Trieste System” of scientific institutions:
ICTP, SISSA, SCIENCE AREA PARK, ICGEB which stimulated
the establishment of many more **TASC, INFM, ELETTRA...**

ICTP and SISSA

WHY Trieste? Why Losinj?

An initiative of the Physics Consortium in **Trieste** to honour **Paolo Budinich** (born in **Losinj** 95 years ago), father of the “Trieste System” of scientific institutions: ICTP, SISSA, SCIENCE AREA PARK, ICGEB which stimulated the establishment of many more TASC, INFM, ELETTRA...

The initiative started ten years ago, holding a first International Conference to celebrate the 85th anniversary of Paolo Budinich

ECSAC was formally created a few years later, but to bring it unto the real axis there is still a long way to go and the local support from the Losinj authorities is a necessity

10 International Conferences on Science, Arts and Culture

"Sustainable Energy: Challenges and Opportunities"

Veli Lošinj (Croatia), August 23-27 2010 Trieste (Italy), August 28 2010

"Grid Computing: a new tool for Science and Innovation"

Veli Lošinj (Croatia), August 25-29 2009

"Black Holes in General Relativity and String Theory"

Veli Lošinj (Croatia), August 24-30 2008

"Science for Cultural Heritage"

Veli Lošinj (Croatia), August 28-31 2007

"The Cultural Heritage and its diversity at the origin of creativity"

Mali Lošinj (Croatia), August 28-31 2006

"Are there Quantum Jumps? On the Present Status of Quantum Mechanics"

Trieste and Mali Lošinj (Croatia), September 5-9 2005

"Nanosciences and Nanotechnology"

Mali Lošinj (Croatia), September 6-10 2004

"The role of mathematics in physical sciences"

Veli Lošinj (Croatia), August 25-29 2003

"Predictability in natural sciences"

Mali Lošinj (Croatia), August 16-21 2002

"A multi-disciplinary meeting in the Adriatic Region"

Mali Lošinj (Croatia), September 17-19 2001

TRANSVERSITY 2011

Third International Workshop on

TRANSVERSE POLARIZATION PHENOMENA IN HARD SCATTERING

29 August - 2 September 2011

Veli Lošinj, Croatia

TRANSVERSITY 2011

Third International Workshop on
**TRANSVERSE
POLARIZATION
PHENOMENA IN
HARD SCATTERING**

29 August - 2 September 2011
Veli Lošinj, Croatia

thanks to our sponsors

- The Trieste Physics Consortium (apologies from the president G.C. Ghirardi)
 - The Trieste Section of INFN
 - The ICTP
- and still expect
- ELETTRA synchrotron light source, CRT Foundation,

and, of course **ECSAC**

the PRIN2008 Sections

the International Spin Physics Committee

the MUNICIPALITY of LOSINJ

not to mention the support of a citizen of the world,
whose name is Raymond Prag
