**Almost All MRI Magnet has become re-condensation type Magnet**

# 4K-GM Cryocooler application for SCM –Conductive Cooling-

Large Heat Load through Current Leads

> 1W by 100 A Current Leads

1986 High Tc Superconductor was Found !!  
High Tc Current Lead was developed

**Breakthrough Technologies 4K-GM Cryocooler + HTS Current Lead**

# High Tc Superconducting Current Lead developed by Toshiba

**Heat Load through Current Leads < 0.1W by 100 A**

# First Liquid Helium Free SCM cooled by 4K-GM Cryocooler

Presented at International Cryogenic Engineering Conference (ICEC15), June, 1994, Genova, Italy

**NbTi Coil was first cooled by 4K-GM Cryocooler (6T at φ180mm)**  
**Nb<sub>3</sub>Sn coil was added later(10T at φ100mm)**

# Commercialized Cryocooler-Cooled SCM for Research Use (1995)

TOSHIBA

## 冷凍機直冷式超電導マグネット

Helium-Free Superconducting Magnet

### 特長

- 液体ヘリウム不要  
煩わしい液体ヘリウム注液作業が一切不要です。
- 簡単操作  
スイッチを押すだけで10Tまでの磁場を発生します。
- 省エネ設計  
消費電力はコンプレッサーの5.3kW (50Hz)のみです。  
液体ヘリウムが不要なので、従来の経費を大幅に削減しました。
- 安全設計  
万一超電導マグネットが常電導化しても液体ヘリウムの拡散がなく事故の心配がありません。  
クエンチ時に保護回路が作動し超電導コイルを保護します。

### 用途

- 物性測定
- 水処理
- 磁場下の化学反応
- 結晶成長
- 磁気分離
- 磁場配向
- 生体磁気効果
- 微生物繁殖
- 流体磁場制御
- 着磁

Liquid Helium Free, Easy Operation, Low Running Cost, Safety

# Superconducting Magnet for Silicon Single Crystal Puller

Toshiba has manufactured superconducting magnets for Silicon Single-Crystal Pullers since 1988. Recently, liquid Helium free magnets are dominant.

## Effect of Magnetic Field

### Effect of high magnetic field

Suppression of convection and temperature gradient..  
Extend life of crucible.

### Improvement of productivity

Good quality of silicon ingot.  
Increasing yield.

## Overview of Silicon Single Crystal Puller

# Superconducting Magnet for Single Crystal Puller

Center Field	Wafer Size
0.3 T	200 mm
0.4 T	300 mm

# Large Detector Magnet for Osaka University

Central Filed	T	1.0
Stored E	MJ	4.2
Coil ID	m	2.1
Coil Length	m	2.9
Current	A	189
Coil No	P	14
Conductor	mm	$\Phi 1.2/\text{NbTi-Cu}$
Cryocooler	W	1.5W @4.2K $\times 3$ 35W @50K $\times 3$
