

*Quantum Computing and
Quantum information from
EFTs Measurements*

Vincent Craft - Leiden AQA

6th General Meeting of the LHC EFT Working Group

November 16th 2023

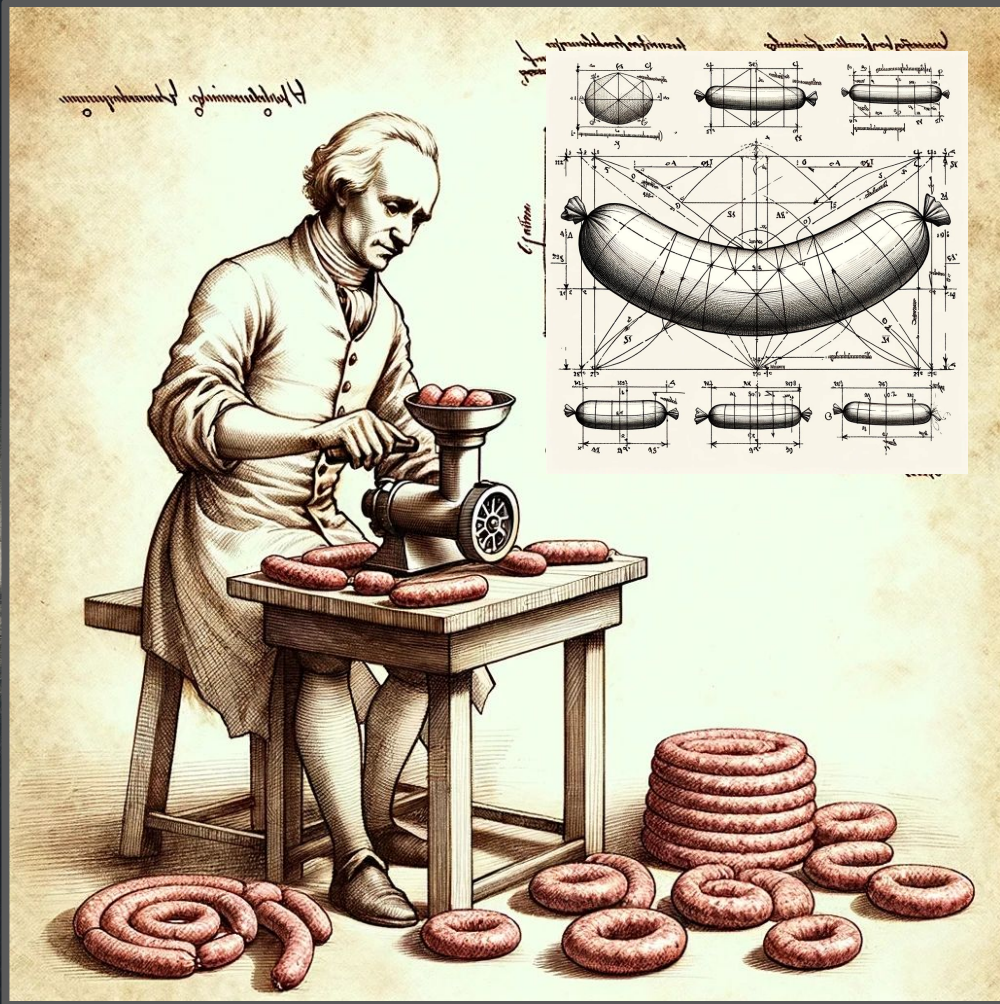

Require: H linear combination of tensor products of Pauli matrices

Choose a variational ansatz $V(\theta)$

Choose starting set of values for θ

While do:

- Prepare the state $|\psi(\theta)\rangle$
- From measurements of $|\psi(\theta)\rangle$ in different bases estimate $\langle\psi(\theta)|H|\psi(\theta)\rangle$
- Update θ according to minimizer

Standard Model of Particle Physics

Simulation Based Inference

Symbolic Regression

Generative Modelling
