### **Session Program**

23-25 May 2011

# 18th RD50 Workshop (Liverpool) Pixel and 3D sensors

Liverpool University of Liverpool Conference Office The Foresight Centre 1 Brownlow Street

## Wednesday 25 May

#### 09:00

#### **Pixel and 3D sensors**

Session | Location: Liverpool, University of Liverpool Conference Office The Foresight Centre 1 Brownlow Street | Convener: Richard Bates

#### 09:00-09:20

Lab measurements and testbeam results of irradiated n<sup>+</sup>-in-n planar pixel sensors for IBL and beyond

#### Speaker

Mr André Rummler

#### 09:20-09:40

## Characterization and Testbeam Analysis of irradiated Silicon n-in-p Pixel Detectors for the ATLAS Upgrade

Speaker

Philipp Weigell

#### 09:40-10:00

#### Micron n-in-p analogue SCA pixel detector fine neutron radiation characterization

Speaker

Mr Dean Charles Forshaw

#### 10:00-10:20

#### Characterization and test beam studies for FE-I3 planar n-in-p and 3D doublesided pixel sensors for the ATLAS upgrade

Speaker

Mr Roger Caminal Armadans

#### 10:20-10:50 Coffee Break

#### 10:50-11:10 Recent results from Atlas 3d collaboration

Speaker

Dr Giulio Pellegrini

#### 11:10-11:30

#### Update of 3D Simulations and Processing of New BNL 3D-Trench-Electrode Detectors

**Speaker** Zheng Li

#### **11:30-12:00 Discussions on Pixel and 3D**

Speaker

Richard Bates

13:30

12:00-13:30 Lunch Break
