## Recent results on dual readout crystal EM calorimetry

*Thursday, June 13, 2024 6:46 PM (1 minute)*

Dual readout crystal calorimetry allows state-of-the-art electromagnetic resolution while preserving excellent jet energy resolution. We report here updated results from the CalVision and MaxiCC collaborations, including new results from an electron test beam at DESY. We also present new results on full simulations of the calorimeter incorporated into the IDEA detector
