Progress on layouts and designs for FCC surface sites

Tuesday 11 June 2024 14:00 (30 minutes)

Following the outcomes of the collaboration between CERN and Fermilab (US Department of Energy), this talk will present the progress on the design and preparation of all 8 FCC surface sites.

The presentation will discuss the various inputs considered to demonstrate the feasibility and adaptability of surface sites in accordance with technical, environmental, and urban constraints. It will also provide some thoughts for future studies on the FCC buildings.
