High Gradient RF Progress : Toward Tev-scale Accelerators

Wednesday, August 10, 2011 4:30 PM (30 minutes)

Research on the basic physics of high-gradient, high frequency accelerator structures and the associated RF/microwave technology are essential for the future of discovery science, medicine and biology, energy and environment, and national security. We will review the state-of-the-art for the development of high gradient linear accelerators.
