## **BABAR Results on Leptonic and Radiative B and Charm Decays**

*Wednesday, 10 August 2011 16:30 (18 minutes)*

We present present measurements of B and charm flavor changing neutral current processes, including inclusive and exclusive  $b \rightarrow s \gamma$  and  $B \rightarrow K \nu \bar{\nu}$ . We also present results of BABAR studies of leptonic decays of charged B and Ds mesons, in particular  $B \rightarrow \tau \nu$  and  $D_s \rightarrow \tau/\mu \nu$ .
