A Search For MSSM Higgs Boson in the Mode $H \rightarrow \tau\tau$

Friday 12 August 2011 08:18 (18 minutes)

We report on a search for a BSM Higgs Boson in the mode $H \rightarrow \tau\tau$ conducted by the CMS experiment with the data accumulated during the 2010 & 2011 running of the LHC at $\sqrt{s} = 7$ TeV.
