

CHACAL 2024

15-26 Jan 2024, Johannesburg, South Africa

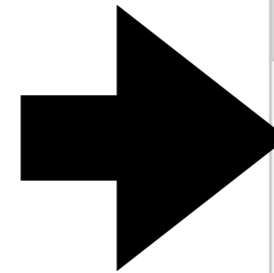

Farewell!

Feels like long ago

Slides and content

- All the material from the school will be available from the agenda in the long term
- We hope you can use this as a resource to come back and revisit the material !

Chacal competition

- Please remember the MadGraph + Rivet + CONTUR competition!
- Open until 15 Feb (a few more weeks) to deepak.kar@cern.ch lcorpe@cern.ch
- Objective: determine the exclusion from LHC measurements on this new VLQ model.
- Live science: we don't know the overall science, but we suspect it could be interesting :)
 - Let's see where it leads!
- If you have difficulties with any of the steps you are allowed to contact us!

Certificates of Attendance

- As far as we understands not everyone needs them...
- ... but **if you do need one, please email us** and we will send you one via email!

Thank you!

- It's been an intense two weeks covering a wide range of material.
- We hope you enjoyed it learned, formed connections, and will take away practical skills from this event!
- We are grateful in particular to our student+organisers **Wandile, Clarisse** and **Hannah** for excellent local support :) And of course **Deepak** for hosting us at Wits!
- Also to **Florence, Ragnie, Maddalena** and **Emily!**
- Thanks again also to **CNRS, NRF, iThemba Labs, Wits, LPC** and **NITheCS** for financial and infrastructure support without which none of this would have been possible.

Safe journey home!
