

7th FCC Physics Workshop - International Forum of National Contacts meeting

Bulgaria, Cyprus, Greece, Israel, Romania, Serbia, Turkiye

Călin Alexa, IFIN-HH and University of Bucharest

[Bulgaria: Mariyan Bogomilov](#)

For the moment, we do not have anything to report on our FCC activities. Our situation is pretty much the same as in Greece,
Regards, Mariyan

[Cyprus: Panos Razis](#)

on behalf of the HEP Group of Cyprus, I would like to brief you that we are in the process of increasing the critical mass of our faculty members, postdoctoral fellows and other researchers working in the high energy physics projects at CERN. Therefore, considering our other currently running obligations, we will need some more time before we can definitely commit human resources to the FCC activities.

Best regards, Panos

[Greece: Paris Sphicas](#)

Greece due to our commitments in the HL-LHC we do not have much/anything to say at the moment.

However, we plan to get organized in the next year or so.

Best regards, Paris

[Israel: Eilam Gross](#)

[Serbia: Lidija Zivkovic](#)

I need to check with a group that is involved in studies of the future machines if they have something new with respect to the last year. We are very small community and many people are busy with other commitments.

I will send what I have if any.

Best regards, Lidija

- a) Recent achievements/highlights of your country **in the PED domain:**
- participate in DRD 1, 4 and 6 - MoU's will be signed this year
- b) Status and foreseen evolution of the person power:
- 3 institutions: IFIN-HH, University of Bucharest, Politehnica University of Bucharest
 - Discussions with other groups and institutions - in progress
 - Students will join the project after the funding is secured
 - Evolution of the person power: upgrade Phase II commitments and budget constraints
- c) Position of the funding agency in your country/region. Status of MoU's.
- participation in CERN experiments: 3-year long funding scheme - renewal this year
 - MoU is mandatory - will be signed this year
- d) Comments on alternative efforts on different future colliders (other than FCC) if any. Support of the HEP community ?
- no alternative participation on different future colliders
 - Romanian HEP community is interested in joining FCC

Türkiye: İlkay TÜRK ÇAKIR and Özgür ETİŞKEN

- a) Recent achievements/highlights of your country in the PED domain:
 - Participate in DRD3- MoU will be signed (Ankara Uni., Bolu Abant Izzet Baysal Uni.)
 - Participate in DRD1- MoU signed last year (Istinye Uni., Bolu Abant Izzet Baysal Uni., Uludag Uni.)

- b) Status of the evaluation of the person power
 - Graduate students will join the project after finding support

- c) Position of the funding agency in your country/region Status of MoU's?
 - 14 universities signed MoU for FCC Feasibility Study process
 - 2 universities are in progress

- d) Comments on alternative efforts on different future colliders (other than FCC) if any. Support of HEP community?
 - already participation in the study for CLIC, LHeC
 - Turkish HEP community is well interested in joining FCC
