## XIII International Conference on New Frontiers in Physics 2024

XIII International Conference on New Frontiers in Physics 26 Aug - 4 Sep 2024, OAC, Kolymbari, Crete, Gree

Contribution ID: 126

Type: Talk

# Beyond the Standard Model in the Higgs sector

Tuesday 27 August 2024 17:40 (20 minutes)

The discovery of the Higgs boson with the mass of about 125 GeV completed the particle content predicted by the Standard Model. Even though this model is well established and consistent with many measurements, it is not capable to solely explain some observations. Many extensions of the Standard Model addressing such shortcomings introduce additional Higgs bosons, beyond-the-Standard-Model couplings to the Higgs boson, or new particles decaying into Higgs bosons. In this talk, the latest searches in the Higgs sector by the ATLAS experiment are reported, with emphasis on the results obtained with the full LHC Run 2 dataset at 13 TeV. (Resonant HH/SH searches are covered in a different talk)

## Internet talk

No

## Is this an abstract from experimental collaboration?

Yes

#### Name of experiment and experimental site

ATLAS

#### Is the speaker for that presentation defined?

Yes

## Details

Simon Grewe - MPI Munich - Germany

Authors: VIVARELLI, Iacopo (Universita e INFN, Bologna (IT)); GREWE, Simon Gabriel (Max Planck Society (DE))

Presenter: GREWE, Simon Gabriel (Max Planck Society (DE))

Session Classification: High Energy Particle Physics

Track Classification: Main topics: High Energy Particle Physics
