

CMS Offline experiences with NoSQL data stores

Tuesday 7 June 2011 14:30 (30 minutes)

The CMS Offline project has been developing against “NoSQL” data stores since 2009 and have experience with three projects in particular; CouchDB, Kyoto Cabinet and MongoDB. We present how these tools are used in our software, why they were chosen and lessons we’ve learnt along the way.”

Authors: METSON, Simon (H.H. Wills Physics Laboratory); KUZNETSOV, valentin (cornell)

Co-authors: EVANS, Dave (FNAL); TUURA, Lassi (FNAL/CERN)

Presenter: KUZNETSOV, valentin (cornell)

Session Classification: Technologies I
