Current results and a future outlook for very large neutrino telescopes

Wednesday 29 May 2024 14:00 (30 minutes)

Over more than a decade, the IceCube Neutrino Observatory has accumulated enormous datasets of neutrinos with energies in the GeV to PeV-scale, opening a new window in searches for beyond the Standard Model physics at the energy frontier. In this talk I will discuss the latest IceCube results, including on-going new searches for sterile neutrinos and dark matter, and provide a look forward of what to expect from the next generation of neutrino telescopes including the Canada-based Pacific Ocean Neutrino Experiment.

Keyword-1

high-energy neutrinos

Keyword-2

IceCube, P-ONE

Keyword-3

Primary author: GRANT, Darren (Simon Fraser University)

Presenter: GRANT, Darren (Simon Fraser University)

Session Classification: (PPD) W3-2 Dark Matter and Neutrinos | Matière noire et neutrinos (PPD)

Track Classification: Symposia Day (Wed May 29) / Journée de symposiums (Mercredi 29 mai):
Symposia Day (PPD - PPD) - Dark Matter and Neutrinos / Matière noire et neutrinos
