

CMS Team: feedback on AI coding tools

- Poll conducted among the team members
- Most of the active developers within the CERN Team make use of ChatGPT and/or Copilot on a regular basis.
 - about 40% of them own a personal license for one of these tools
 - about 5% got a licence thanks to their CERN affiliation
- VS-code is the most widespread IDE
 - others IDE used typically by no more than 1 person in the group: Visual Studio, JetBrains CLion, IntellyJ, PyCharm
