

SWIFT-HEP #6

Conclusions

22 November 2023

The plan for phase 2

- This is the beginning of a long discussion
- I'll collect these thoughts and other ideas from this workshop in a document
 - Invite people to comment, contribute, criticise, ...
 - "Usual" etiquette. You can
 - Write your thoughts (provide your name)
 - Comment on something written by others (use comment feature or add text)
 - Do not delete other people's text
 - Email threads may (or may not) start from there
 - Then collect and tidy up to send to STFC
- Proposed timeline
 - Open the document this week
 - Circulate until 15 Dec (before XMas)
 - Tidy up and prepare early in the new year

Next meeting and a few miscellanea

- Joint meeting with GridPP 25 to 27 March in Sheffield

Very useful summary of the progress across the project
(Which we also need for reporting purposes!)

Please also think about submitting abstracts to conferences: e.g. ACAT, CHEP, ...
It's good for SWIFT-HEP and it is useful for you as well ;-)

Quote of the day:

“ I don't think Disney runs photons through liquid Xenon very often “

Thanks!!

To Luke and Henning for hosting us in Bristol

Safe travel and see you in Sheffield in March
