Policy Discussion
FIM4R - Copenhagen - 30 Jan 2024
David Kelsey - UKRI-STFC

FIM4R

Topics to discuss

FIM4R

What is required by Research Communities?
          (note - ignore technical details and address requirements rather than solutions)

- ease of use
    - registration, AUP acceptance, Privacy Notice, identity management, authorisation….
- operational trust
    - Why should Research Communities trust the identity federations?
    - and what about the proxies?

What policies do we need to encourage and enable operations and interoperability

Can also collect IdP and identity federation requirements from the Research Communities
(but that is not the main thrust of FIM4R)

Brainstorming - Approach

F I M 4 R

- Split the room into 4 groups
  - Nominate a spokesperson, scribe, ….
- Brainstorm important requirements for each Research Communities
  - Trust of federated Identities, IdPs and Proxies
  - Ease of Use
- Document (an electronic document, slides, …)
- We will collect these afterwards
- Spokesperson of the group reports the outcomes
- 20 minutes to brainstorm, 20 minutes to report
