

Fourth High Energy Physics School in Măgurele - 2011

Wednesday 26 October 2011 - Friday 28 October 2011

National Institute of Physics and Nuclear Engineering - IFIN-HH

Scientific Programme

The main goal of the school is teaching various aspects of high-energy physics, mainly on particle physics. General lectures on subjects at the forefront of research are followed by students presentations based on their working topics. The school is targeted to students at the end of the Master studies or at the beginning of their PhD thesis.
