

**WELCOME**

# CERN OSPO Inauguration Event

CERN is the world's biggest laboratory for particle physics.

Our goal is to understand the most fundamental particles and laws of the universe.

# Four pillars underpin CERN's mission

RESEARCH

# We develop technologies in three key areas

ACCELERATORS

DETECTORS

COMPUTING

# Large Hadron Collider (LHC)

- 27 km in circumference
- About 100 m underground
- Superconducting magnets steer the particles around the ring
- Particles are accelerated to close to the speed of light

# Giant detectors record the particles formed at the four collision points

# The LHC produces more than 1 billion particle collisions per second

The energy of the particles in collision is converted into new particles.

The detectors measure the energy, direction and charge of new particles formed.

They are analogous to the 3D cameras taking 40 million pictures a second, of which 1000 are selected and recorded.

# The Worldwide LHC Computing Grid (WLCG)

WLCG

- Stores, distributes, processes and analyses LHC experiments' data.
- 1.4 million processing cores in 170 data centres and more than 40 countries.
- 1500 Petabytes of CERN data stored world-wide.

## EXPERIMENTS SELECTION

- ALICE
- CMS
- ATLAS
- LHCb

## TIERS SELECTION

- TIER 0
- TIER 1
- TIER 2
- TIER 3

# CERN's future

## Driven by the **2020 Update of the European Strategy for Particle Physics**

- Upgrade to High-Luminosity LHC (2029-2041)
- Technical and financial feasibility study of a Future Circular Collider (report for end 2025)
- Accelerator R&D to develop technologies for FCC and for alternative options
- Detector and computing R&D
- Maintain and expand a compelling scientific diversity programme
- Continue to support other projects around the world

COLLABORATION

# Science for peace

## CERN was founded in 1954 with 12 European Member States

### 23 Member States

Austria – Belgium – Bulgaria – Czech Republic  
Denmark – Finland – France – Germany – Greece  
Hungary – Israel – Italy – Netherlands – Norway  
Poland – Portugal – Romania – Serbia – Slovakia  
Spain – Sweden – Switzerland – United Kingdom

### 3 Associate Member States in the pre-stage to membership

Cyprus – Estonia – Slovenia

### 7 Associate Member States

Croatia – India – Latvia – Lithuania – Pakistan  
Türkiye – Ukraine

### 6 Observers

Japan – Russia (suspended) – USA  
European Union – JINR (suspended) – UNESCO

### Around 50 Cooperation Agreements with non-Member States and Territories

Albania – Algeria – Argentina – Armenia – Australia – Azerbaijan – Bangladesh – Belarus – Bolivia  
Bosnia and Herzegovina – Brazil – Canada – Chile – Colombia – Costa Rica – Ecuador – Egypt – Georgia – Honduras  
Iceland – Iran – Jordan – Kazakhstan – Lebanon – Malta – Mexico – Mongolia – Montenegro – Morocco – Nepal  
New Zealand – North Macedonia – Palestine – Paraguay – People's Republic of China – Peru – Philippines – Qatar  
Republic of Korea – Saudi Arabia – Sri Lanka – South Africa – Thailand – Tunisia – United Arab Emirates – Vietnam

CERN's annual budget  
is 1200 MCHF (equivalent  
to a medium-sized European  
university)

As of 31 December 2022  
Employees:  
**2658** staff, **900** fellows

Associates:  
**11 860** users, **1516** others

# A laboratory for people around the world

## Distribution of all CERN Users by the country of their home institutes as of 31 December 2022

Geographical & cultural diversity  
Users of **110 nationalities**  
**19.4% women**

### Member States **7147**

Austria 85 – Belgium 129 – Bulgaria 43 – Czech Republic 244  
Denmark 49 – Finland 90 – France 844 – Germany 1225  
Greece 119 – Hungary 73 – Israel 64 – Italy 1527  
Netherlands 169 – Norway 79 – Poland 305 – Portugal 100  
Romania 109 – Serbia 33 – Slovakia 70 – Spain 383  
Sweden 103 – Switzerland 406 – United Kingdom 898

### Associate Member States in the pre-stage to membership **69**

Cyprus 15 – Estonia 30 – Slovenia 24

### Associate Member States **382**

Croatia 38 – India 132 – Latvia 16 – Lithuania 14 – Pakistan 35  
Türkiye 122 – Ukraine 25

### Observers **2991**

Japan 216 – Russia (suspended) 873 – United States of America 1902

### Non-Member States and Territories **1271**

Algeria 2 – Argentina 13 – Armenia 8 – Australia 21 – Azerbaijan 2 – Bahrain 4 – Belarus 18 – Brazil 122  
Canada 199 – Chile 34 – Colombia 21 – Costa Rica 2 – Cuba 3 – Ecuador 4 – Egypt 20 – Georgia 32  
Hong Kong 15 – Iceland 3 – Indonesia 5 – Iran 11 – Ireland 5 – Jordan 5 – Kuwait 4 – Lebanon 13 – Madagascar 1  
Malaysia 4 – Malta 1 – Mexico 49 – Montenegro 4 – Morocco 19 – New Zealand 5 – Nigeria 1 – Oman 1  
Palestine 1 – People's Republic of China 333 – Peru 2 – Philippines 1 – Republic of Korea 147 – Singapore 2  
South Africa 52 – Sri Lanka 10 – Taiwan 45 – Thailand 17 – Tunisia 2 – United Arab Emirates 7 – Viet Nam 1

# TECHNOLOGY & INNOVATION

# CERN's technological innovations have applications in many fields

CERN is the birthplace of the World Wide Web

**And there are many more examples**

Medical imaging, cancer therapy, material science, cultural heritage, aerospace, automotive, environment, health & safety, industrial processes.

# CERN's technological innovations have important applications in medicine and healthcare

Technologies applied at CERN are also used in PET, for medical imaging and diagnostics.

CERN produces innovative radioisotopes for nuclear medicine research.

Accelerator technologies are applied in cancer radiotherapy with protons, ions and electrons.

Pixel detector technologies are used for high resolution 3D colour X-ray imaging.

A group of students, both male and female, are gathered around a large piece of scientific equipment in a laboratory or workshop. They are wearing hard hats (yellow and blue) and lanyards. One student in the foreground is adjusting a component of the equipment. The background shows a white wall with a green exit sign and various cables and equipment.

# EDUCATION & TRAINING

# CERN's training, education and outreach programmes

900 graduates  
(including Research Fellows)

3 000 PhD students

300 Undergraduate students in  
Summer programmes

>14 000 teachers participating in  
dedicated programmes, since 1998

Around 150 000 visitors on guided  
tours of CERN, from >50 countries

4.7M followers on social media,  
from around the globe

# CERN Science Gateway

CERN's new education and outreach centre for all publics aged 5-plus.

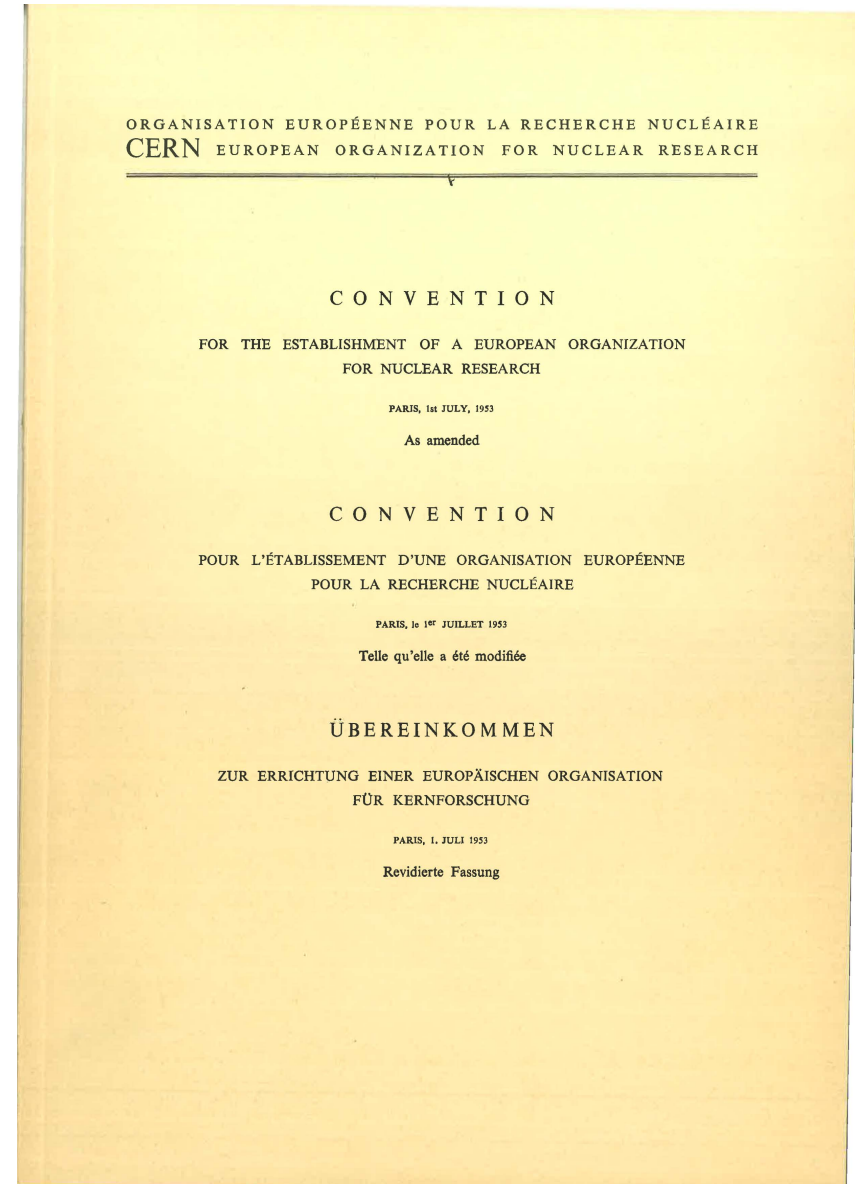

Inaugurated  
7 October 2023.

Immersive exhibitions,  
education labs, events  
and shows.

# CERN Convention

Founding principles of the Organization include that ...  
*the results of its experimental and theoretical work shall  
be published or otherwise made generally available.*

# Open Science at CERN

2012

**Open Source Licence Task Force at CERN**

2014

**CERN Open Access Policy released**

(highly successful: 95% of CERN articles published OA)

**CERN Open Data Portal**

Jun 2020

**ESPP update:** “...shape the emerging consensus on Open Science ...  
implement a policy of Open Science for the field.”

Nov 2020

**LHC Open Data Policy released**

Feb 2021

**Creation of the Open Science Strategy Working Group**

Oct 2022

**Open Science Policy released**

Apr 2023

**Open Science Policy – implementation plan released**

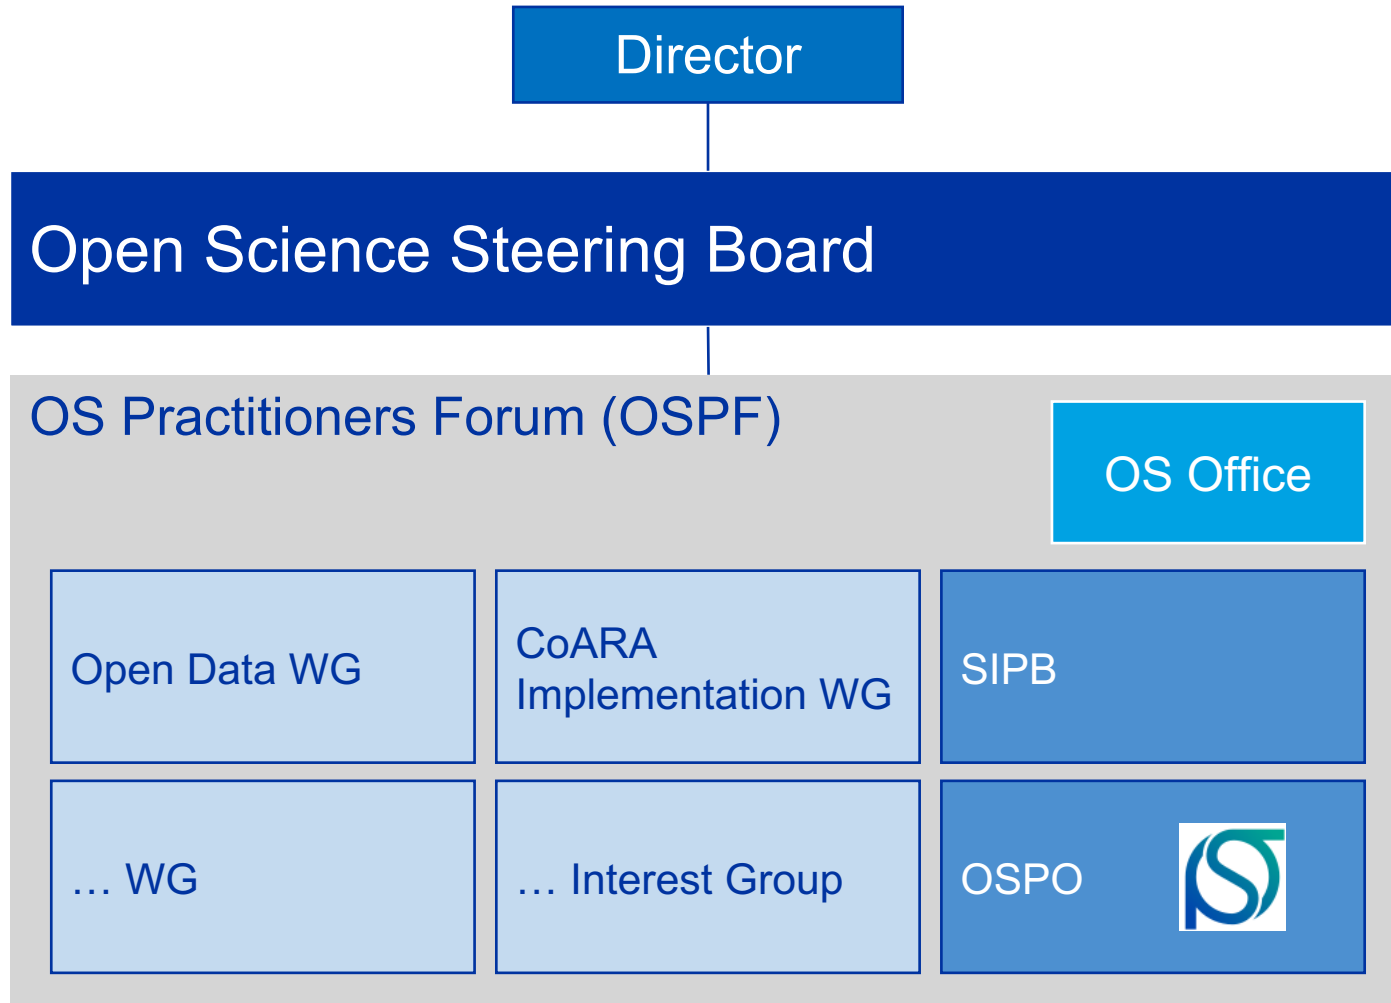

Nov 2023

**Open Source Programme Office and Open Science Office established**

# Open Science Policy

1. Open access to publications
2. Open data
3. Open source software
4. Open hardware
5. Research integrity, reuse and reproducibility
6. Infrastructure provision for open science
7. Research assessment and evaluation
8. Education, training and outreach

# CERN OS Governance Framework

- Responsible for OS strategy & policy
- Consists of department/experiment reps
- Open forum for CERN-wide exchange
- Meets at least 2x per year
- Groups ensure OS implementation
- Provide input to annual OS Report
- CoARA - Coalition for Advancing Research Assessment
- SIPB – Scientific Information Policy Board
- OSPO is part of this new structure

# CERN Open Source

- Open Source is fully embedded in CERN culture
  - WWW
- CERN Software available via Open Source Initiative licenses
  - Software to analyse experimental data, such as ROOT
- CERN hosts Open Source projects
  - Zenodo - platform for sharing research output
- CERN contributes to other Open Source initiatives
  - Software for IT infrastructures
- CERN established an Open Hardware License
  - White Rabbit to distribute precise timing across distributed systems

# CERN OSPO

- Open Source Programme Office approved in May 2023 – now up and running with official launch today
- CERN OSPO covers Open Source Software and Hardware
- Spans all sectors with representatives from many departments, in particular Knowledge Transfer
- Internally – provide community support, create synergies across departments
- Externally – help to make CERN’s expertise more visible, including synergies with other domains
- The OSPO team is integrated in the wider CERN community. Thanks to them for their commitment!
