

9th FRIEND-Water Global Conference 2023 | Université Cheikh Anta Diop, Dakar

Monday 25 September 2023 - Friday 29 September 2023

Faculté de Médecine, Université Cheikh Anta Diop, Dakar, Senegal

Book of Abstracts

Contents

Quantifying Environmental Water Use	1
Two ecohydrological solutions to reduce urban runoff: examples from Lyon (France) and Quérétero (Mexico)	1
Monitoring Coastal Ecosystem Evolution for a Sustainable Blue food security	1
Do the water stable isotopes ($\delta^{18}\text{O}$ and $\delta^2\text{H}$) give insight into the hydrological impact of agroforestry systems? The case of <i>Faidherbia albida</i> parklands in the Senegalese Groundnut basin	1
The effect of soil moisture on the physiological parameters of millet and groundnut during a period of water deficit at the beginning of rainy season.	1
The augmented biodiversity to improve the domestic waste water cleaning through Nature Based Solutions	1
Monitoring of shoreline changes using aerial drone photogrammetry in Mediterranean coast	1
Impacts of the spatial evolution of salinity conductivity and hydrogen potential (ph) in the fisheries of Lake Nokoue (southern Benin).	2
Characterizing soil hydraulic properties using best method in a semi-arid agrosysteme parcel land (the peanut basin of senegal)	2
Smartcleangarden concept to provide a value to domestic waste waters in saving waters in tropical cities	2
Quantifying Environmental Water Use	2
Forest-Water Nexus: An Evapotranspiration assessment of the Kafue River Sub-Basin using remote sensing	2
Study of the continental waters of the Republic of Djibouti: physico-chemical characteristics and biological (Biodiversity).	2
The impacts of competing freshwater resource uses on quality : case of the transboundary Falémé River (Sénégal)	2
Immobilization of <i>Phragmites australis</i> peroxidase onto a porous silicon electrode SiO_2/Al to enhance its activity and stability to degrade an azo dye: Amaranth.	3
Characterization of extreme high water hydroclimatic events in the complex of lower monocouffo valley	3

Spatio-temporal evolution of rainfall extremes in the city of dakar	3
Flood risk zone mapping of the Bonoumin-palmeraie watershed using analytic hierarchy process (AHP) and sensitivity tests methods	3
Urban sprawl process in Dakar: impact on runoff and flooding	3
Rainfall risks and hydro-agricultural developments in the Aga-Foua-Djilas watershed.	3
Assessment of the hydrological resilience of the n'zi river basin in Côte d'Ivoire using the Budyko framework.	3
Floods on the Ouémé River basin in Benin: A holistic approach of management	4
Trend Analysis of Low Flows in North Algeria	4
Updating of the intensity-duration-frequency curves (IDF) in the District of Abidjan (Côte d'Ivoire).	4
Impacts of climate variability on the resources of the Gambia River watershed	4
Projected water accounts under climate change in the transboundary Volta River Basin	4
The resilience of the Saloum islands (Senegal) in the face of the challenges of access to drinking water: what contribution of the Notto-Diosmone-Palmarin (NDP) transfer system in the governance of water resources in an island environment?	4
Influence of climate change on the water resources in the Central Andes of Argentina	4
The role of fishponds in hydrologic regime	5
Adapting Multireservoir Operation to Long-term Climate Variability Under Climate Change	5
Wavelet analysis of spatio-temporal variability in surface soil moisture under different landuses in southwestern Nigeria	5
Portrait of the Koular watershed (Central-Western Senegal) to facilitate effective development to curb saline intrusion.	5
The contribution of the spatial distribution of rainfall for the understanding of the hydrological functioning of the Upper Oum Er-Rbia basin (upstream Machraa Edahk) - Morocco	5
The International Sediment Initiative (ISI) and its Case Studies on Sediment Management in River Basins	5
Dynamics of flow in a highly anthropized watershed: application to the coastal basin of the somone for water resource management and planning	5
Evolution of rainfall maximum discharge and solid transport in northern Algeria	6
First assessment of dissolved and particulate matter biogeochemistry of the Kasai River	6
Transboundary basins: Governance and cooperation among African States	6

Use of reanalysis data to estimate water requirements of major crops in the Senegal River Delta	6
Vulnerability of surface water bodies and development of irrigated agriculture: assessment of the ecological quality of the Guiers lake (Senegal)	6
Exploring the “Water-Energy-Food-Ecosystems” nexus in the Senegal river basin: an approach combining participatory workshops and hydroeconomic modelling	6
Assessing hydrological processes and water uses beyond official data in Africa: examples from the Senegal River Basin	6
Availability of water resources in the Bango reserve under the anti-salt dam of Diama in the Senegal River delta	7
Opportunities for the Agrarian Dynamics in the West African Floodplains	7
Impact of infrastructures on inland water presence within the senegal river basin using gis techniques	7
Women in transboundary water conflict resolution in the Nile basin: a comparative study between Migingo islands in Kenya and Kagera river in Rwanda.	7
The impact of climate variability on water resources in the Lac de Guiers area	7
Pesticides residues accumulation in freshwater and fish in the Guiers Lake basin: Risks for Senegal’s strategic water reservoir	7
Improvement of the classical water balance equation: case study of the Tabular Middle Atlas	7
Risks of overflow and salinization of the marigot of Mbao (Senegal) and their impacts on socio-economic activities.	8
Evaluating the Impact of Climate Variability and Anthropogenic Activities on Streamflow Condition in Large River Basin using Budyko-based Functions	8
Approach of geophysical prospecting (1D) to the knowledge of groundwater resources of the Sissili sub-catchment Burkina-Faso	8
Assessment of the risk of pollution of an area suitable for the establishment of a water point: case of the department of Yamoussoukro (Central Côte d’Ivoire)	8
The marine intrusion in the Maghreb countries bordering the Mediterranean Sea.	8
Groundwater salinity in Senegal : geomorphological factors and spatialisation	8
Overexploitation of the Maastrichtian aquifer in Senegal	8
Functional and statistical study for 3 cycles of the losses with high temporal resolution (1 hour) measured in the bed of the Gardon (France) downstream from Ners (Gard)	9
Rising groundwater levels and pollution in the Thiarye aquifer of Dakar Senegal: water management in a rapidly growing urban environment	9
Assessment of climate extremes on groundwater in Africa and projection of their medium and long term impacts	9

Urban flooding in West Africa: holistic approaches to urban management in West Africa - the case of the propagation of rainfall floods in Cotonou	9
Impacts of climate change on river sustainability in a semi-arid agricultural region of South Africa	9
Identifying non water-related leverages to improve water security at the local scale	9
Using the water footprint concept to understand the link between water scarcity and violent conflicts in the Central-West Africa sub-region.	9
Charm-EU pilot capstone on climate resilience of farming communities	10
A teaching unit designed in innovative and active pedagogy to understand and meet the climate resilience transdisciplinary challenges that are facing our territories (south and north) labeled by the UNESCO ICIREWARD center	10
Water balance of ponds and their place in the agropastoral society of the Patar commune (Senegal)	10
Transdisciplinarity - a need for the education of people on the Climate Change: the example of GFS in Senegal	10
An adaptation of a scientific animation tool: the water mural	10
Delegation of public drinking water service management - an alternative to the community management model for improving access to water in rural Senegal.	10
Integrated stormwater management in a context of major development of a new city: case of the urban pole of diamiadio (dakar/senegal)	10
Impacts of socio-economic activities on the quality of water resources in the commune of darou khoudoss.	11
Agriculture urbaine genre et résilience climatique à Korhogo (nord de la Côte d'Ivoire) . .	11
Groundwater quality and risk assessment of heavy metal pollution using water quality index as a communication tool: Evidence from Ejigbo (Lagos-Nigeria)	11
The characterization of groundwater and assessment of water quality of the Continental Terminal aquifer in Casamance (Senegal): hydrodynamic - multivariate statistic and hydrochemical approach	11
Spatiotemporal variability of water quality parameters in the Niger River	11
Rising groundwater levels and pollution in the thiaroye aquifer of Dakar (Senegal): water management in a rapidly growing urban environment	11
Linking fish assemblages to hydro-morphology and physico-chemical parameters in the Pendjari River (Benin - West Africa)	12
Application of principal component analysis (PCA) for the physicochemical and bacteriological characterization of a tropical hydro system waters: Case of n'djili river watershed (DRC).	12
Runoff Sensitivity to Climate Variability and Land Cover Change reveals a second Sahel Hydrological Paradox	12

Mise en place de modèles de prédétermination des débits dans les bassins non jaugés : cas du bassin versant transfrontalier de la Comoé (Côte d'Ivoire - Mali - Burkina - Ghana)	12
Past and future hydrological extremes analysis over the Senegal river basin	12
Application du modèle swat pour la modélisation de l'écoulement dans un bassin versant peu jauge en zone soudano- sahélienne (burkina faso)	12
Analysis of the start and end dates of the rainy season in the Kayanga/Geba and Koliba/Corubal river basins (Guinea - Senegal - Guinea-Bissau)	12
Numerical modelling of flooding in sub-Saharan African cities: Insights from Ouagadougou Area - Burkina Faso	13
Hydrological modelling with the SWAT tool of the Sandougou watershed in a context of climate change	13
Paradox of water security and governance in the mountain range of fouta djallon	13
Investigating past and future changes of hydroclimatic extremes in the Ouémé headwater catchment in West Africa	13
Study of climate variability in the Mountain District of Côte d'Ivoire (1961 to 2020). . . .	13
Variabilite interannuelle de la pluviometrie de la zone forestiere aux savanes dans le sud-ouest centrafricain	13
Large-Scale Climatic Drivers of Long-term variability in the Frequency of Flood Events across Sub-Saharan Africa	13
Water Resources Resilience of the « false » West African Water Tower	14
Dry spells in the Ichkeul lake basin (Tunisia): diagnosis of droughts using daily data . .	14
Effects of climate change on water requirements of orange trees in the Mitidja plain in Algeria	14
Quantifying and partitioning the uncertainties of climate change impacts on hydrology and hydropower potential under 1.50C and 2.00C Global Warming Levels in the Headwaters of the Benue River Basin - Cameroon	14
Analyse spectrale des précipitations mensuelles dans les régions situées au Centre du Sénégal.	14
HAMR: drought monitoring system	14
Valorization of meteorological archives in Côte d'Ivoire	14
Hydrosos: Implementing a global Hydrological Status and Outlook System from the bottom up	15
Innovative approaches in water resources status and forecasting –a global perspective .	15
Facilitating access to global runoff data: API and tools for GRDC data sets	15
Quantifying the uncertainty of ADCP discharge measurements through inter-comparisons	15

Open and Free Datasets for Hydrology Research: Insights Challenges and Opportunities	15
Dynamique territoriale autour de l'activité minière artisanale et des ressources en eau en Afrique de l'Ouest : une réflexion transdisciplinaire pour des solutions durables . . .	15
Socio-economic assessment of access and management of drinking water in island areas: case of the island of Niodior (Fatick-Senegal)	15
A FRIEND-Water perspective on Bridging Data Knowledge Gaps in Hydrology	16
The Global Runoff Database –A unique archive for river discharge data	16
ROBIN - A Reference Observatory of Basins for international hydrological climate change detection	16
New time series of gridded climatic variables for Czechia and their potential for nationwide hydrology	16
The Global Terrestrial Network - Hydrology (GTN-H): a unique source of global hydrolog- ical observations	16
The International Soil Moisture Network (ISMN): A permanent service for delivering long- term in situ soil moisture data	16
Apport des outils spatiaux dans la compréhension de paramètres hydrologiques dans le bassin versant Djiguimar	16
Application of remote sensing to water quality parameters over lakes using time series from Sentinel-2 and Landsat-8/9. Study case: laguna grande - bíobio - chile	17
Satellite-based monthly surface water storage database for the Congo basin from 1992-2015	17
Characterization of flooding in the Mono basin with the HEC RAS model	17
Flood risk management and local development in the Dyonkoto - Boubon strip in Niger: remote sensing approach	17
Modeling freshwater discharge of poorly monitored African rivers using remote sensing- based land surface model	17
Harnessing spatial patterns of satellite data for multivariate hydrological model calibration	17
Contribution of remote sensing to flood hazard mapping in the Riviera-Bonoumin water- shed in the District of Abidjan (Ivory Coast)	17
Evaluation of global gridded rainfall products in the main hydrosystems of Senegal: Casamance - Gambia - Senegal	18
Analysis of the performance of satellite products for estimating evapotranspiration in the Senegal River Delta	18
Groundwater Potential Zone mapping using Geographical informationsystem by Fuzzy- Analytic Hierarchy Process in humid area: case study (Ghar El Melh (North Eastern of Tunisia))	18

Groundwater Recharge Zone Mapping Using GIS-based Multi-Criteria Evaluation and Analytical Hierarchy Process: A Case Study of Trarza Aquifer (Mauritania)	18
Variability of the Senegal River floodplain under climate change scenarios	18
Sensitivity of the GR4J model to different estimating methods of potential evapotranspiration	18
Satellite-based Rainfall Estimates to Simulate Daily Streamflow Using a Hydrological Model over Gambia Watershed	19
Open earth observation data for water accounting in large river basins: case of the Volta River basin in West Africa	19
The great Niaye of Pikine (Dakar): water management in chronic uncertainty	19
Projected changes in the rainfall annual cycle over the Senegal River Basin using CMIP5 bias-corrected simulations	19
Effect of the SWATPLUS input parameters on the modeling of the Senegal River flow at the Bafing - Bakoye - Faleme	19
First approaches for the development of the SWAT model in the Senegal River Basin	19
Keynote	19
Keynote	19
Co-managing scarce water resources in agricultural areas: A stakeholder centred approach	20
Presentation of UNESCO IHP-IX and FRIEND-Water	20
Brainstorming on FRIEND-Water activities for 2023-2029 (in groups)	20
Defining IHP-IX milestones for FRIEND-Water 2023-2029 (in groups)	20
Synthesis and next steps	20
Presenting NUNIEAU: free software for data rescue of hydrometeorological graphic records	20

ST1 | Ecohydrology / 3

Quantifying Environmental Water Use

ST1 | Ecohydrology / 4

Two ecohydrological solutions to reduce urban runoff: examples from Lyon (France) and Quérétaro (Mexico)

ST1 | Ecohydrology / 5

Monitoring Coastal Ecosystem Evolution for a Sustainable Blue food security

ST1 | Ecohydrology / 6

Do the water stable isotopes ($\delta^{18}\text{O}$ and $\delta^2\text{H}$) give insight into the hydrological impact of agroforestry systems? The case of *Faidherbia albida* parklands in the Senegalese Groundnut basin

ST1 | Ecohydrology / 7

The effect of soil moisture on the physiological parameters of millet and groundnut during a period of water deficit at the beginning of rainy season.

Corresponding Author: ndiayeballa@outlook.fr

ST1 | Ecohydrology / 8

The augmented biodiversity to improve the domestic waste water cleaning through Nature Based Solutions

ST1 | Ecohydrology / 9

Monitoring of shoreline changes using aerial drone photogrammetry in Mediterranean coast

ST1 | Ecohydrology / 10

Impacts of the spatial evolution of salinity conductivity and hydrogen potential (ph) in the fisheries of Lake Nokoue (southern Benin).

ST1 | Ecohydrology / 11

Characterizing soil hydraulic properties using best method in a semi-arid agrosysteme parc land (the peanut basin of senegal)

Corresponding Author: walyjuniorfaye@gmail.com

ST1 | Ecohydrology / 12

Smartcleangarden concept to provide a value to domestic waste waters in saving waters in tropical cities

ST1 | Ecohydrology / 13

Quantifying Environmental Water Use

ST1 | Ecohydrology / 14

Forest-Water Nexus: An Evapotranspiration assessment of the Kafue River Sub-Basin using remote sensing

ST1 | Ecohydrology / 15

Study of the continental waters of the Republic of Djibouti: physico-chemical characteristics and biological (Biodiversity).

ST1 | Ecohydrology / 16

The impacts of competing freshwater resource uses on quality : case of the transboundary Falémé River (Sénégal)

ST1 | Ecohydrology / 17

Immobilization of *Phragmites australis* peroxidase onto a porous silicon electrode SiO_2/Al to enhance its activity and stability to degrade an azo dye: Amaranth.

ST2 | Climate change & Water resources resilience / 18

Characterization of extreme high water hydroclimatic events in the complex of lower mono-couffo valley

ST2 | Climate change & Water resources resilience / 19

Spatio-temporal evolution of rainfall extremes in the city of dakar

Corresponding Author: evrardkoffi96@yahoo.fr

ST2 | Climate change & Water resources resilience / 20

Flood risk zone mapping of the Bonoumin-palmeraie watershed using analytic hierarchy process (AHP) and sensitivity tests methods

ST2 | Climate change & Water resources resilience / 21

Urban sprawl process in Dakar: impact on runoff and flooding

ST2 | Climate change & Water resources resilience / 22

Rainfall risks and hydro-agricultural developments in the Aga-Foua-Djilas watershed.

ST2 | Climate change & Water resources resilience / 23

Assessment of the hydrological resilience of the n'zi river basin in Côte d'Ivoire using the Budyko framework.

ST2 | Climate change & Water resources resilience / 24

Floods on the Ouémé River basin in Benin: A holistic approach of management

ST2 | Climate change & Water resources resilience / 25

Trend Analysis of Low Flows in North Algeria

Corresponding Author: h.meddi@ensh.dz

ST2 | Climate change & Water resources resilience / 26

Updating of the intensity-duration-frequency curves (IDF) in the District of Abidjan (Côte d'Ivoire).

ST2 | Climate change & Water resources resilience / 27

Impacts of climate variability on the resources of the Gambia River watershed

ST2 | Climate change & Water resources resilience / 28

Projected water accounts under climate change in the transboundary Volta River Basin

ST2 | Climate change & Water resources resilience / 29

The resilience of the Saloum islands (Senegal) in the face of the challenges of access to drinking water: what contribution of the Notto-Diosmone-Palmarin (NDP) transfer system in the governance of water resources in an island environment?

ST2 | Climate change & Water resources resilience / 30

Influence of climate change on the water resources in the Central Andes of Argentina

ST5 | Large rivers management / 125

Variability of the Senegal River floodplain under climate change scenarios

ST5 | Large rivers management / 126

Sensitivity of the GR4J model to different estimating methods of potential evapotranspiration

ST5 | Large rivers management / 127

Satellite-based Rainfall Estimates to Simulate Daily Streamflow Using a Hydrological Model over Gambia Watershed

ST5 | Large rivers management / 128

Open earth observation data for water accounting in large river basins: case of the Volta River basin in West Africa

ST5 | Large rivers management / 129

The great Niaye of Pikine (Dakar): water management in chronic uncertainty

ST5 | Large rivers management / 130

Projected changes in the rainfall annual cycle over the Senegal River Basin using CMIP5 bias-corrected simulations

ST5 | Large rivers management / 131

Effect of the SWATPLUS input parameters on the modeling of the Senegal River flow at the Bafing - Bakoye - Faleme

ST5 | Large rivers management / 132

First approaches for the development of the SWAT model in the Senegal River Basin

Plenary session / 133

Keynote

Plenary session / 134

Keynote

Joint ST1/ST2/ST5 session / 135

Co-managing scarce water resources in agricultural areas: A stakeholder centred approach

Corresponding Author: davidgwapedza@gmail.com

UNESCO IHP-IX / 136

Presentation of UNESCO IHP-IX and FRIEND-Water

UNESCO IHP-IX / 137

Brainstorming on FRIEND-Water activities for 2023-2029 (in groups)

UNESCO IHP-IX / 138

Defining IHP-IX milestones for FRIEND-Water 2023-2029 (in groups)

UNESCO IHP-IX / 139

Synthesis and next steps

140

Presenting NUNIEAU: free software for data rescue of hydrometeorological graphic records
