SUNET Drive - Sweden - Community Site Report

Monday 11 March 2024 16:45 (15 minutes)

SUNET Drive is Sweden's national data storage solution, and part of the ScienceMesh. It is a federated solution consisting of 54 nodes, one for every Swedish institution, including one node for external users. We will give an up-to-date overview of SUNET Drive, including

- User and storage development
- New customer on-boarding and customizations
- Updates and incidents
- Extension to a third data center
- Implemented and planned features

Special focus of the community report will lie on the plan to develop SUNET Drive into a sovereign academic toolbox, capable of FAIR data handling and data analysis. This includes our efforts in developing Secure Zones and Step-up-Authentication, as well as the integration of RDS and the development of a new connector for the Swedish National Dataservice system DORIS. In addition, we will briefly talk about "Scalable JupyterHub", funded through GN5-1 - GÉANT Project Incubator, and planned to be integrated into SUNET Drive.

Primary authors: ANDERSSON, Magnus (SUNET); NORDIN, Micke (SUNET); FREITAG, Richard

Presenters: ANDERSSON, Magnus (SUNET); FREITAG, Richard

Session Classification: Services and Infrastructures

Track Classification: Main sessions: CS3 Community Site Reports
