Exploring Nextcloud Tables

Tuesday 12 March 2024 17:00 (20 minutes)

Managing structured data seamlessly alongside files is crucial, especially in research and collaborative projects.

This presentation introduces you to Nextcloud Tables, a tool to blend spreadsheet functionality with database management. With its user-friendly interface, Nextcloud Tables caters to a wide array of professional needs without requiring advanced coding skills.

Discover how Nextcloud Tables revolutionizes data handling by allowing the creation of customizable tables, supporting various data types from simple text to complex progress bars and date/time fields. Learn how it enhances team productivity with real-time collaboration, sharing and integration.
