

Facilities Discussion

Presentations:

1. On a new proton irradiation line at the Birmingham MC40 cyclotron
2. Simulations and verifications to improve the precision detection of a beam telescope from the Hamburg group
3. Proton hardness factor at the Bonn Cyclotron Irradiation Site
4. About neutron detection and SEE effects in the new proton beam HISPANoS at CNA, Sevilla

Points for discussion

1. Are those facilities open for other RD50/DRD3 people
2. If they are available, which is the Access procedure?
