

IPv6. Are we there yet?

Thursday, 18 April 2024 10:05 (55 minutes)

IPv6 has been designed to replace IPv4. Yet, 25 years later, we are still widely using IPv4. This lecture takes a look at the differences between the two protocol versions, how IPv6 is meant to reduce the complexity of IPv4 and some of the reasons adoption of IPv6 has not yet reached 100%.
