Comments and Questions to MD Procedures

- **MD10766: Crystal collimation performance with ions**
 - General comment: Avoid using names as “safe beams” or “safe limit”; use “setup beam” or “below the setup beam flag” instead
- **MD9263: Schottky-based chromaticity measurements**
 - General comment: Avoid using the name “safe limit” (see above)
 - Are there interlocks foreseen to be masked?
