

Overview of CLEAR activities and outlook

Dear all,

after various discussions, my proposal for the CLEAR talks at the CLIC mini-workshop next week (Tue 12/12 from 16:25 onward) :

- R. Corsini - (15 min + 5 min discussion) CLEAR 2023 highlights and status of the second beam line - W. Farabolini (25 min + 5 min discussion) CLEAR operational improvements and beam dynamics studies - A. Aksoy (15 min + 5 min discussion)

(I have given a bit more time to Wilfrid, since it should cover quite a bit more than me and Avni. Next time Alex and Pierre will be the victims...)

Cheers,
Roberto
