

The CMS AOD model

Wednesday 28 March 2007 16:00 (30 minutes)

CMS experiment uses ROOT as storage technology for all its data formats. Interactive access is foreseen both in bare-ROOT mode and with loading of data formats shared libraries. The extensibility and modularity of CMS data formats and the native interactive capabilities make CMS event data model a suitable medium for data analysis from batch processing to interactive plots.

Presenter: LISTA, Luca (INFN Napoli/CMS)
